

**REMARKS**

Claims 1-58 are all the claims pending in the Application. Applicant respectfully traverses the reasons set forth in the Notice, and requests reconsideration and allowance of the pending claims in view of the following comments.

Applicant submits that the present specification, without the guidance algorithm disclosed in "Advanced Navigation, Guidance and Control, and their Applications," Chapter 6, by Ching-Fang Lin, published by Prentice Hall Series (1991), contains a written description of the claimed invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and sets forth the best mode contemplated by the inventor of the present application of carrying out the claimed invention. Accordingly, Applicant requests withdrawal of the objection to the specification, as well as the enablement rejection to claims 1-58.

Applicant believes that the Examiner's rejections in the Office Action of April 27, 2005, and the Notice of September 6, 2005, have been overcome and submits that the subject application is in condition for allowance. Should any issues remain unresolved, the Examiner is invited to telephone the undersigned attorney.

Respectfully submitted,

CUONG TU HUA
